

Sukanya Gurav

Senior Frontend Engineer

sukanyagurav5867@gmail.com | +91 8850018702 | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building and delivering production web applications using React, TypeScript, JavaScript, Svelte, and Lit. Experienced in developing scalable user interfaces, reusable component architectures, RESTful APIs, and backend microservice integrations, with strong Problem solving skills for complex frontend challenges. Strong background in frontend performance, automated testing, responsive and accessible UI development, and Excellent Communication Skills when collaborating with product, design, QA, and backend engineering teams.

KEY SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Front End Frameworks: React.js, Svelte, Lit, Tailwind CSS, SASS/SCSS, HTML5, CSS3, Next.js, Framer motion, Animations

Backend & Databases: Node.js, Go, RESTful APIs, MongoDB

State Management: Redux, Zustand

Testing tools & Quality: Jest, Vitest, React Testing Library (RTL), Playwright, Unit Testing, Integration Testing, End-to-End Testing

DevOps, Build & Developer tools: Git, GitHub, Azure, GitHub Actions, Docker, Webpack, Vite, Chrome DevTools, CI/CD, NPM

Web Performance & UX: Core Web Vitals, Lighthouse, User Experiences, Code Splitting, Lazy Loading, Caching, Responsive Design, Accessibility, Cross-Browser Compatibility, WCAG

AI-Assisted Development: GitHub Copilot, Claude Code

Authentication & Security: OAuth, JWT, Penetration Testing

Design Tools: Figma, Zeplin

Languages: English (Fluent)

Software Engineering: Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Frontend Software Developer - Kyndryl | Bangalore, India | November 2023 – Present

- Delivered 20+ production features across enterprise web-based applications using TypeScript, Svelte, and Lit, following established software development methodologies and version-control practices while integrating Go microservices and RESTful web services.
- Created data visualizations and interactive dashboards with Apache ECharts, improving efficient rendering through code splitting, lazy loading, caching, and component-level optimization validated with Lighthouse and Core Web Vitals.
- Translated product requirements and Figma designs into responsive, accessible interfaces using HTML5, CSS3, and reusable UI patterns, applying strong attention to detail while collaborating with product, UX, QA, and engineering teams.
- Integrated JSON-based REST APIs with backend services, implementing asynchronous data flows, structured error handling, and resilient client-side behavior across server-side integrations.
- Troubleshoot production API, UI, and browser issues through root-cause analysis using Chrome DevTools and application monitoring, improving issue resolution within a collaborative Agile development environment.
- Maintained 95%+ automated test coverage using Jest, Vitest, React Testing Library, and Playwright, including component testing, integration testing, and E2E validation within CI/CD workflows.
- Remediated frontend security vulnerabilities identified through penetration testing by applying secure coding practices, allow-list validation, and query-parameter sanitization before production release.
- Standardized the frontend design system and component architecture using reusable UI patterns, TypeScript, established design patterns, and clean-code principles to improve consistency and maintainability across enterprise applications.
- Implemented internationalization(i18N) across Svelte applications by integrating reusable localization patterns and translation resources into shared frontend components.

Associate Technical Engineer – Kyndryl | June 2021 – November 2023

- Built React and TypeScript web applications for enterprise workflows, converting business requirements and Figma designs into responsive HTML/CSS interfaces with reusable frontend patterns.

- Connected frontend applications with backend services through RESTful APIs and asynchronous data flows, collaborating with backend engineers on integration requirements and resilient error handling.
- Strengthened application quality through unit, integration, component, and end-to-end testing with Jest, Vitest, and Playwright, supported by automated CI/CD checks.
- Evaluated software development requirements and technical constraints within collaborative environments, communicating trade-offs with product, design, QA, and backend teams.

EDUCATION

Bachelor of Science in Information Technology — University of Mumbai | 2017 – 2020 | CGPA: 8.23

HSC — D.G. Ruparel College | 2015 – 2017 | Percentage: 71.08%

SSC — Maharashtra Board | 2015 | Percentage: 91.20%

ACHIEVEMENTS

- Power of Win Award – Kyndryl, November 2023
